

ONCOCHART Boost increases the productivity, cost effectiveness and compliance of the hospital-wide electronic health record (EHR) currently in use:

**EVERYTHING YOU NEED...NOTHING YOU DON'T.**

***Specially designed for Hospital Environments!***

**ONCOCHART BOOST PROVIDES:**

*Medicare compliant documentation*

*Advanced charge capture*

*Robust compliance*

*Attractive pricing starting at under \$20,000*

**NOT AN EMR:**

*Not for Meaningful Use*

*No patient portal or electronic prescribing*

*No duplication of tasks*

*(Features: FREE interfaces, FREE report generation, NO "per seat" license)*

ONCOCHART Boost is an add-on software tool that focuses on the crucial areas of compliance, documentation and advanced charge capture like no general EHR/EMR can.

## ONCOCHART Boost is the solution for:

### COMPLIANCE:

- Maintains current CCI edits
- All charges are checked for compliance as they occur with a warning if an edit is discovered
- Billing personnel are given the opportunity to correct any issues PRIOR to submission

### DOCUMENTATION:

- Contains professional layouts for every procedure
- Finished narratives are compliant and complete
- Layouts can be modified to your specifications

### CHARGE CAPTURE:

- A customizable Protocol Manager warns of potential missed charges

### PRODUCTIVITY IMPROVEMENT:

- Both Physicians Home Page and Patient Calendar simplify Patient Management
- ONCOCHART Boost's chart view – a simple tree format minimizes unnecessary key strokes
- Connects to all hospital systems such as MEDITECH, Cerner, Epic, ALLSCRIPTS, McKesson and more with no additional costs for interfaces

ONCOCHART has all the NCCI edits built in and updated every 3 months as new edits are published. This safeguard allows the clinical team a warning if a charge would trigger an edit.
