

Preventative Care (Patient reminders)

Provide more than 20% of unique patients age 65 years or older or 5 years old or younger a reminder for preventative/follow-up care based on the patient's preference.

You can set each patient's contact preference under *Contact Info* in the patient navigator.

How to meet this measure using ONCOCHART -

You can add patient reminders to ONCOCHART by going to *Utilities > Patients > Patient Reminders*. Click *Add Reminder*, select your *Patient*, select your *Reminder Type**, select the date on which you want to remind the patient, enter any reminder notes and choose *save*.

The screenshot shows a web-based form titled "ADD/EDIT PATIENT REMINDER" with a green header. The form contains the following fields and controls:

- Selected Patient:** A text input field containing ".**", ELI" and a "Select Patient" button.
- Reminder Type:** A dropdown menu showing "Follow-Up Visit" and a "Manage Types" button.
- Reminder Date:** A date picker showing "2/11/2014".
- Recurrence Days:** A spinner control showing "0".
- Mark as completed:** A checkbox that is currently unchecked.
- Notes:** A large text area containing the text "Remind to come in for a follow-up visit on 2/18/14."
- Buttons:** "Save" and "Cancel" buttons at the bottom.

If you've set the patient's contact preference and added the specific contact information to the chart, it will appear in the reminder module. This will save you time by your not having to look up the contact information in the patient chart.

Once you remind the patient, check the reminder completed box. *Contact ONCOCHART support if you need help implementing this functionality.*

Patient Name	Reminder Type	Contact Preference	Date	Completed
***, EUJ	Follow-Up Visit	Phone	2/11/2014	<input type="checkbox"/>
