

Preventative Care (Patient reminders)

More than 10% of all unique patients who have had 2 or more office visits with the EP within 24 months before the beginning of the EHR reporting period were sent a reminder, per patient preference when available.

In simpler form, CMS wants you to complete a reminder in 2014 for the patients that you have seen for an office visit twice at your facility in the last 2 years leading up to the beginning of your reporting period.

You can set each patient's contact preference under *Contact Info* in the patient navigator.

How to meet this measure using ONCOCHART -

You can add patient reminders to ONCOCHART by going to *Utilities > Patients > Patient Reminders*. Click *Add Reminder*, select your *Patient*, select your *Reminder Type**, select the date on which you want to remind the patient, enter any reminder notes and choose *save*.

The screenshot shows a web-based form titled "ADD/EDIT PATIENT REMINDER" with a green header. The form contains the following fields and controls:

- Selected Patient:** A text input field containing ".**", ELI" and a "Select Patient" button.
- Reminder Type:** A dropdown menu showing "Follow-Up Visit" and a "Manage Types" button.
- Reminder Date:** A date picker showing "2/11/2014".
- Recurrence Days:** A numeric input field showing "0".
- Mark as completed:** A checkbox that is currently unchecked.
- Notes:** A text area containing the text "Remind to come in for a follow-up visit on 2/18/14."
- Buttons:** "Save" and "Cancel" buttons at the bottom.

If you've set the patient's contact preference and added the specific contact information to the chart, it will appear in the reminder module. This will save you time by your not having to look up the contact information in the patient chart

Once you remind the patient, check the reminder completed box. *Contact ONCOCHART support if you need help implementing this functionality.*

Patient Name	Reminder Type	Contact Preference	Date	Completed
***, ELJ	Follow-Up Visit	Phone	2/11/2014	<input type="checkbox"/>
