

## Medication Reconciliation

The EP who receives a patient from another setting of care or provider of care or believes an encounter is relevant should perform medication reconciliation for more than 50% of those transitions.

### How to meet this measure using ONCOCHART -

Perform the medication reconciliation and notate this in the INI: *INI > Allergy/Rx/Chemo > Reconciliation > Med Reconciliation MU*.

The screenshot displays the ONCOCHART interface. At the top, there are tabs for 'Demographics', 'Problem', 'Past Hist', and 'Allergy/Rx/Chemo'. Below these tabs is a vertical list of buttons: 'Allergies', 'Outside Meds', 'RX Written Here', 'Reconciliation' (which is highlighted in blue), 'Chemotherapy', and 'PQRS 130 Meds'. To the right of this list, there is a section titled 'Medication Reconcilia...'. Below this title is a label '\*Med Reconciliation MU' with a green downward arrow. Underneath is a blue dropdown menu with a downward arrow. The dropdown menu is open, showing the options 'Yes' and 'No'.
