

Electronic Notes

Enter at least one electronic progress note *created, edited and signed* by an EP for more than 30% of unique patients with at least one office visit during the EHR reporting period. The text of the electronic note must be text searchable and may contain drawings and other content.

How to meet this measure using ONCOCHART –

- 1.) Create and record one weekly progress note on each patient who has had an office visit within the reporting period.
OR
- 2.) You can also meet this measure by creating and recording one clinical note on each patient who has been seen for an office visit within the reporting period.

CMS states that the electronic progress note **must** be from an eligible professional. By default, an E&M note in ONCOCHART requires a physician signature. If you've altered this permission or instructed ONCOCHART support to alter this permission, you might be out of compliance if you attest to this MU measure.
