

Medication Reconciliation

The EP who receives a patient from another setting of care or provider of care should perform medication reconciliation for more than 50% of those transitions.

How to meet this measure using ONCOCHART -

Perform the medication reconciliation and notate this in the INI: *INI > Allergy/Rx/Chemo > Reconciliation > Med Reconciliation MU*.

The screenshot displays the ONCOCHART interface. At the top, there are four tabs: 'Demographics', 'Problem', 'Past Hist', and 'Allergy/Rx/Chemo'. Below these tabs is a vertical list of buttons: 'Allergies', 'Outside Meds', 'RX Written Here', 'Reconciliation' (highlighted in blue), 'Chemotherapy', and 'PQRS 130 Meds'. To the right of this list, a dropdown menu titled 'Medication Reconciliation...' is open, showing the option '*Med Reconciliation MU' with a green arrow icon. Below this, a blue box contains the text 'Yes' and 'No'.
