

Public Health Reporting – Specialized Registry

Participate in successful ongoing submission of electronic data information from CEHRT to a specialized registry for the entire EHR reporting period.

According to CMS, providers should contact their local or state public health agency for information and instructions on submitting public health related data to satisfy the Meaningful Use measures (See CMS FAQ #3605 <https://questions.cms.gov/faq.php?id=5005&faqId=3605>).

How to meet this measure using ONCOCHART -

This portion was not required to become a 2014 certified EHR. For this reason, you will not be able to meet the Public Health Reporting – Specialized Registry measure using ONCOCHART.

An Eligible Provider in 2016 only needs to meet 2 of the Public Health Reporting measures.
